

DDMWorks Coil Cover, 2.0L/2.4L Ecotec

The DDMWorks Coil Cover will fit both the 2.4 (LE5) and the turbo 2.0 (LNF) motors. Our Coil Cover comes with stainless steel hardware to attach directly to the Cam/Valve cover. This piece hides the valley between the intake and exhaust cams where the spark plugs and ignition coils sit. It will cover up most of the unsightly wires and gives your engine top a very smooth look. Not only does your engine bay look great, but by removing the plastic factory engine cover with all the foam insulation, you'll let your engine heat escape better from the top of the head, by allowing airflow over the Cam/Valve cover.

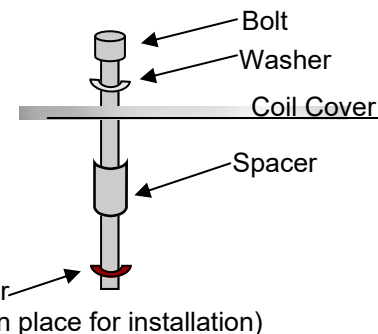

INSTALLATION IS EASY!

HARDWARE LIST	
QTY	ITEM
4	M6x45 socket head bolts
4	M6 flat washers
4	Rubber washers
4	1 1/4" aluminum spacers

TOOLS NEEDED
M5 Allen key
