Installation Instructions 7-19-22

Model SRT-20RCH

Spyder 2020+RT Cupholder Kit.

Steps needed to install your 2020+ RT Rear Cupholder Kit

1.- First remove the rear passenger seat. Locate the side rear black panel screw on either side of the RT that you want to mount the holder as shown below. Remove it and take the holder base mount and install back in the same screw hole using the factory screw. The cross bar should mount flat against the panel as shown to support the lower bracket. Tighten down but do not over tighten as this is a plastic mount the screw screws into.

2.- Then adjust the cupholder to fit your needs as shown above. This kit allows many mounting options that will fit your needs. Reinstall the passenger rear seat. Adjust the cupholder as needed.

We thank you for purchasing one of our RT Accessory Kits. We know today the need for accessories that provide a higher level of comfort while riding and we have solved that demand with a stylish system that compliments the design of your Spyder!
